## **Q Software's SEC-Qure® E1 Suite Achieves Oracle Validated Integration with Oracle's JD Edwards EnterpriseOne**

*Q Software Continues its Commitment to Oracle JD Edwards Customers with the Oracle Validated Integration of the Latest Release of its Security and Compliance suite, SEC-Qure® E1, an Effective Leading Security and Compliance Solution for Oracle's JD Edwards EnterpriseOne*

Q Software Global Limited, a Gold-level member of Oracle® PartnerNetwork (OPN), today announced it has achieved Oracle Validated Integration of SEC-Qure® E1 Suite version 4 with Oracle's JD Edwards EnterpriseOne 9.0.

The SEC-Qure® E1 Suite works with JD Edwards EnterpriseOne security, enabling customers to set up and manage a solid security environment with integrated Segregation of Duties (SoD) and multiple roles management. Security implementation and on-going management is simplified and significantly reduces effort. Security for a new user or role can be set up in minutes. Authorized security changes can also be made in minutes.

To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. Written within the JD Edwards EnterpriseOne development environment, SEC-Qure® E1 Suite looks and feels like other JD Edwards EnterpriseOne applications and operates on platforms where JD Edwards EnterpriseOne resides.

"Q Software was one of the first OPN partners to provide security, risk management and compliance solutions and achieve Oracle Validated Integration with Oracle's JD Edwards EnterpriseOne," said David Hunt, Marketing Director at Q Software. "We are pleased to continue our on-going commitment to Oracle and its JD Edwards customers with this validated integration of the latest release of our security and compliance suite SEC-Qure® E1. With enhanced user experience, security automation and auditing capability, we believe this is one of the easiest and most effective security and compliance solutions for Oracle's JD Edwards EnterpriseOne."

"The Oracle Validated Integration applies a rigorous technical review and test process," said Kevin O'Brien, senior director, ISV and SaaS Strategy, Oracle. "Achieving Oracle Validated Integration through Oracle PartnerNetwork gives our customers confidence that the integration between Q Software's SEC-Qure® E1 Suite version 4 and Oracle's JD Edwards EnterpriseOne 9.0 has been validated and that the products work together as designed. This reduces risk and improves the implementation cycles for our joint customers."

The SEC-Qure® E1 Suite also builds security using preconfigured reusable components, which can be linked together to quickly and safely build security for users or roles.

Security automation features simplify new security configuration, on-going maintenance and can capture security from earlier releases of JD Edwards EnterpriseOne implementations to take forward into the latest release.

Security can be checked for conflicts and Segregation of Duties violations across multiple roles before committing any changes to the JD Edwards security table, thereby protecting customers from inadvertent errors and minimizing the risk of unintentional posting errors or deliberate attempts to commit fraud.

### **About Oracle Validated Integration**

Oracle Validated Integration through the Oracle PartnerNetwork gives customers confidence that integrations between Oracle Applications (and Oracle Enterprise Manager) and complementary partner capabilities have been validated and the products work together as designed. This can help reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review the integrations of third-party software to Oracle Applications products, including productized repeatable integrations from system integrators. Oracle provides access to Oracle Applications software, tools, technical resources and training to assist partners in developing integrations based on Oracle standards and best practices. Partners who have successfully validated their integrations are authorized to use the “Oracle Validated Integration” logo. For more information, please visit Oracle.com at <http://www.oracle.com/us/partnerships/solutions/index.html>

### **About Oracle PartnerNetwork**

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more visit <http://www.oracle.com/partners>

### **About Q Software**

Q Software is a leading provider of security and compliance solutions to the Oracle JD Edwards community. It has more expertise and more satisfied customers in this area than any other company worldwide with consistent customer satisfaction ratings amongst the highest in the industry. Q Software is a Gold-level OPN partner offering security, risk management and compliance software for Oracle JD Edwards, Oracle PeopleSoft and Oracle E-Business Suite. Its security and compliance solutions reduce risk, reduce effort and reduce costs. With its global sales and support ecosystem, provided by local offices and accredited partners, Q Software provides excellent coverage to service requirements across all continents and most major business languages.
